Relevant Experience

Associate Full Stack Developer Oct 2023 - present
Physics Wallah (PW skills)

- Developed a structured and comprehensive curriculum that covers both fundamental and advanced concepts of full stack web development.
- Break down complex full stack web development concepts into easily digestible lessons to enhance student understanding.
- Create practical and straightforward projects that facilitate mentors in teaching and guiding students effectively.
- Perform thorough quality checks on recorded lecture videos to ensure clarity, accuracy, and completeness of the content.
- Work closely with the design team to ensure that the visual and user experience aspects align with the educational goals.
- Assist the team in seamlessly integrating the Sphere Engine into the Learning Management System (LMS) portal.

Associate Developer Feb 2023 - Oct 2023
iNeuron.ai

- Developing Curriculum and Content for Full Stack Development (MERN Stack)
- Develop practical and engaging projects to help students apply their knowledge and build their skills in the MERN stack.
- Provide support and clear doubts to ensure students fully understand the concepts being taught.
- Work with the team to design and build capstone projects that integrate and apply the full range of skills learned by students.

Projects

- **Note-Keeping App:** Built a full stack application similar to Google Keep. This project will involve creating a web application that allows users to take, organize, and manage notes efficiently. created with the MERN stack technology
- **Language Translator Application:** Developed a React application utilizing the Memory translation API provided by Translated Labs. This app will translate text between multiple languages and provide a user-friendly interface.
- **Pizza application:** Built a full-featured pizza ordering app using the MERN stack (MongoDB, Express, React, Node.js). Designed and developed both the frontend and backend, ensuring mobile responsiveness to deliver a seamless user experience across various devices
- **The Orion Academy Website:** Built the school website from scratch using React, ensuring it is fully functional and visually appealing.

Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Basic Python and Basic Java

Libraries and Frameworks

React, Redux toolkit, Tailwind CSS, React Router, MongoDB, Mongoose, Express, Next.js, API documentation with Swagger, Axios.

Tools and Platforms

Git, GitHub, Netlify, Vercel, Figma, Postman, Vite.js, MongoDB Atlas & MongoDB compass, Render, Railway, AWS, Basic of Docker

Education

Manipur University

Bachelor of Engineering
Computer Science and Engineering

Manipur Board

Higher Secondary in Science Stream

Certifications

- Outstanding Performance Award - PW Skills Web Development Team
- Hackathon participation certificate organized by iNeuron in collaboration with the Native base
- Full stack JavaScript Web Developer - iNeuron.ai
- Full Stack MERN Boot camp by iNeuron (Hitesh Choudhary as Mentor)
- Complete web Development Bootcamp by Udemy (Angela Yu as Mentor)

Hobbies

- Movies
- Reading books
- Travelling
